**DETAILED ACTION**

1. Applicant's election without traverse of Species I, Figures 1-5 and claims 1-10 & 13 in paper dated 9/29/2003 is acknowledged.

***Drawings***

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the slanting of a section of the first core layer and second core set to approximately 5 degrees or less relative to the optical path direction must be shown or the feature(s) canceled from the claims 1-10 and 13. No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-10 and 13 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Art Unit: 2839

Slanting of a section of the first core layer and second core set to approximately 5 degrees or less relative to the optical path direction have been neither described nor shown in the selected species I (Figures 1-5) of the instant invention.
